## Did you know? March is Nutrition Month

### A Healthy School Community:

- Recognizes that healthy students learn better and achieve more;
- Understands that schools can directly influence students' health and behaviours;
- Encourages healthy lifestyle choices, and promotes students' health and well-being;
- Incorporates health into all aspects of school and learning;
- Links health and education issues and systems; and
- Needs the participation and support of families and the greater community!

Did you know? March is Nutrition Month! This is a great time to explore and learn about food. An important part of this is food literacy, which includes having the knowledge and skills to grow, choose, prepare, and talk about food.

Some ways to engage your family during Nutrition Month:

- Get kids involved in meal planning. Ask them to help choose recipes, write out grocery lists and explore grocery store flyers.
- Make cooking a family event! Kids can participate in age-appropriate tasks, such as measuring ingredients or setting the table.
- Enjoy meals together when you are able. Mealtimes can be a great time to connect in conversation!
